HTML, CSS, Sass, Scss, Tailwind CSS, Bootstrap, JavaScript, TypeScript, React.js, Redux, Next.js, Material UI, Flobite React, Shadcn UI, Zustand, Git, Github / GitLab, REST API.

Project

E-COMMERCE ([see demo](#)) (Css, Js)   December 2023

In this project, we can view and save the list of products, evaluate them, search for necessary products, display discounted prices, and add them to the shopping cart.

Alif-Shop website ([see demo](#)) (React.js, scss, axios, zustand)   February 2024

Here you can see the list of commodities , prices and discount prices, search for the desired commodity , select the necessary items for yourself, and read customer recommendations.

Admin panel ([see demo](#)) (React.js, js, MUI)   January March 2024

In this admin panel, we can add, edit, delete, and search for teachers and students.
